

DECREASE YOUR PRINT TIME BY UP TO 50 PERCENT WITH

THE LITTLE SISTER SYSTEM

THE FAST WAY TO PRINT T-SHIRTS

The Little Sister System dramatically increases the number of T-shirts that can be printed DTG WITHOUT permanently modifying the Printer.

The four screws that are replaced on the bed of the printer are the same size thread, just longer.

Now a 10-by-10-foot floor space can become a very profitable work area - using the Little Sister System with your Printer and your Heat Press.

- **ELIMINATE THE BOTTLENECK THAT COMES WITH PRINTING T-SHIRTS.**
 - **SET-UP T-SHIRTS IN SECONDS - LOWER REJECT RATE PER JOB.**
 - **T-SHIRTS ARE CENTERED INSTANTLY.**
 - **AVOID WRINKLES WITH THE PERFECTLY SHAPED PLATEN.**
 - **OPERATE SAFELY - NO MORE BURNED KNUCKLES!**

The Little Sister System works with platens for exact placement of T-Shirts. The platen is guided into place with the Little Sister adapters for the printer, and guided into place with the Little Sister adapters on your heat press. The platen is then returned to its stand for printed T-shirt removal and quick setup for the next T-shirt.

FROM SET-UP → TO PRINTING → TO HEAT PRESS
THE QUICKEST WAY TO PRINT T-SHIRTS WITHOUT HAVING TO RE-ADJUST THE SHIRTS!

**WITHIN MINUTES YOU CAN MODIFY YOUR PRINTER WITH THE LITTLE SISTER SYSTEM!
BY DRAMATICALLY INCREASING THE NUMBER OF T-SHIRTS YOU CAN PRINT EACH HOUR,
YOU'LL MAKE MORE MONEY!**
